Your-Site

Complete Web-Novel Reading Platform

More Stories. More Emotions.

EVERYTHING YOUR WEBSITE INCLUDES

Your-Site is a complete, ready-to-launch website for reading and selling web novels. It comes with its own reader, member accounts, built-in ways to earn money, an optional AI Story Studio, a community forum, a full owner control panel, and mobile-app support — all included. Here is everything it can do:

01 Reading Experience

Everything a reader needs to enjoy your novels — on any device.

- **Chapter reader:** Clean, distraction-free reading page built for long sessions
- **6 reading themes:** Light, Dark, Gray, Sepia, Night (true black) and Forest — each reader picks their own
- **Day / Night site mode:** A site-wide light and dark switch, remembered per visitor
- **Adjustable text size:** Readers set their own font size across the whole site
- **Font choices:** Multiple reading fonts including serif and Georgia
- **Listen aloud (Text-to-Speech):** A built-in audiobook-style player reads chapters out loud, with many natural voices and languages
- **Bookmarks:** Readers save their exact spot in any chapter and jump back later
- **Highlights:** Readers highlight favourite paragraphs and revisit them from their account
- **Continue Reading:** The homepage brings each reader straight back to where they left off
- **Reading history:** A full record of what each reader has read

02 Content & Discovery

Help readers find their next favourite story fast.

- **Unlimited novels & chapters:** No limit on how many stories or chapters you publish
- **Categories & genres:** Organise novels by genre with colourful genre tiles
- **Tags:** Tag novels so readers can browse by theme
- **Live search:** Instant search box in the header — results appear as the reader types
- **Advanced search:** Filter novels by multiple conditions
- **Homepage sections:** Recommended For You, New Arrivals, Most Viewed, Popular, Completed Novels, Latest Chapters, curated genre rows — each can be switched on or off
- **This Week's Top 10:** A swipeable Top 10 chart with a numbered ranking
- **Leaderboard:** Top readers and reading streaks, to keep your community engaged
- **Completed novels page:** A dedicated place for finished stories
- **Ratings & reviews:** Readers rate novels with stars and leave written reviews
- **Author profiles:** Each author gets their own public page listing their novels

03 Earn Money From Your Site

Several built-in ways to turn readers into income.

- **Coin system:** Readers buy coins and spend them to unlock premium chapters
- **Coin packages:** Create and price your own coin bundles
- **Subscriptions:** Offer monthly / yearly membership plans with their own benefits
- **Premium chapters:** Lock any chapter behind coins or a subscription
- **Wallet:** Each reader has a coin wallet and full purchase history
- **Multi-currency:** USD and INR built in, plus any of 140+ world currencies you choose to add
- **Referral / invite friends:** Readers earn coins for inviting friends, growing your audience for free
- **Reading streaks & goals:** Daily streaks and weekly reading goals that reward readers with bonus coins

04 Payments

Accept money worldwide, out of the box.

- **Stripe:** Cards and global payments
- **PayPal:** One-off payments and subscriptions
- **Razorpay:** Popular in India — cards, UPI and more
- **Webhook logs:** Every payment event is recorded so nothing is lost
- **Subscription renewals:** Recurring billing through Stripe and PayPal, plus automatic renewal reminders and a grace period

05 AI Story Studio (optional)

A standout feature few novel sites have — let readers and you create stories with AI.

- **AI Story Studio:** Turn a premise into a real, readable novel — pick a genre, sketch the idea, and write chapters with AI
- **Your choice of AI:** Works with Google Gemini or OpenAI, using your own API key
- **AI chapter generation:** Generate new chapters on demand
- **Continue a novel with AI:** Carry an existing story forward
- **AI grammar check:** Clean up writing automatically
- **Story memory & characters:** The AI remembers characters and plot so chapters stay consistent
- **Export to PDF:** Readers download their AI-made novel as a PDF
- **AI tokens:** Sell AI usage as token packages — another income stream
- **AI profit calculator & dashboard:** Tools to price AI features and track their earnings

06 Community — "Let's Gossip"

A built-in forum keeps readers coming back between chapters.

- **Discussion channels & topics:** Readers chat in channels and start their own topics
- **Live online count:** Shows how many people are online right now
- **Typing indicators & announcements:** A lively, real-time feel
- **Moderation:** Block users and manage gossip settings from the admin panel

07 Member Accounts & Security

Modern, safe accounts your readers can trust.

- **Email sign-up & login:** Standard accounts with email verification
- **Email verification:** New readers confirm their email with a one-time code
- **Passkeys / Face ID / Fingerprint:** Sign in with the device's own biometrics (WebAuthn)
- **Profile & avatars:** Readers set a display name, bio and profile picture
- **Notifications:** In-site alerts for new chapters, replies and updates, with do-not-disturb
- **Stay logged in:** Secure long-lived sessions so readers aren't logged out constantly

08 Mobile App & SEO

Reach more readers and rank on Google.

- **Installable app (PWA):** Readers add your site to their phone's home screen and use it like a native app
- **Custom app icon:** Set the icon readers see on their phone's home screen
- **Fast & mobile-first:** Designed for phones, where most readers are
- **SEO built in:** Clean URLs, sitemap, canonical tags, social share previews and structured data for Google
- **Weekly email digest:** Bring readers back with an automatic weekly round-up

09 Content Protection

Guard the novels you work hard to publish.

- **Reader watermark:** An invisible, per-reader mark on chapters helps trace anyone who copies your content
- **Reading-speed / scraper limits:** Slows down bots trying to steal your whole library
- **Search & bot protection:** Keeps unwanted crawlers out
- **Copy protection on the reader:** Discourages casual copy-paste theft

10 Owner Control Panel

Run the whole site yourself — no coding needed.

- **Full admin dashboard:** Novels, users, payments, comments and AI at a glance
- **Author accounts:** Let other writers submit and manage their own novels, with approval control
- **Bulk chapter import & export:** Add many chapters at once, or export a novel's chapters as a ZIP
- **Admin security:** Login lockout, Google reCAPTCHA and two-factor authentication for admin accounts
- **Branding:** Your own logo, colours, site name and favicon
- **Menus & pages:** Build your own navigation and custom pages
- **Image gallery:** Manage covers and images in one place
- **Announcements & site banner:** Message all your readers at once
- **Custom code & ads:** Drop in analytics or ad network code
- **Backup & restore:** One-click database backups
- **Construction / maintenance mode:** Take the site offline cleanly when you need to
- **User activity & visitor tracking:** See what's happening on your site
- **WordPress user import:** Move your existing WordPress members across

11 Included Legal Pages

Ready-made pages so you can launch properly.

- About Us, Contact Us, FAQ, Privacy Policy, Terms & Conditions, Cookie Policy, Disclaimer, DMCA Policy, Community Guidelines, and Purchase & Refund Policy

12 Licensing & Ownership

What you get when you buy.

- **One-domain licence key:** Your copy activates on one domain and is locked to it
- **Lifetime use on that domain:** No monthly fees to the author to keep it running
- **Full source included:** You receive the complete website files
- **Easy setup:** Upload, enter your database details, enter your licence key — done

Ask us anything before you buy — we're happy to help you get set up.
